

CRYSTALCAM

IMAGING INC.

Light and agile, the Crystal Cam® Inspection Pole is an inexpensive way to reach the unreachable. It's an essential tool for vertical, tank, vessel, and hull inspections, saving time and reducing risk in any confined space assignment. The telescoping pole is made of durable carbon fiber to last longer in tough environments. With SubConn® wet mateable connectors, the pole can even be reconnected under water without resurfacing. Designed for all existing Crystal Cam® Amber or Crystal Cam® Sapphire cameras and tethers.

SPECIFICATIONS
